

MAAZ NASEER

Lafayette, IN | P: +17654124812 | maazbinnaseer@gmail.com | [Linkedin](#) | EIT (in progress)

PROFILE

Environmental Engineer (MSc, Purdue) with a hydrology/hydraulics-focused coursework background and hands-on CAD, hydraulic modeling, and fieldwork experience directly applicable to civil engineering design and water resources projects. FE Date Scheduled (09/01/2026).

WORK EXPERIENCE

Remineralize the Earth **Boston, MA**
Environmental Assistant Volunteer (Remote) **January 2026 - Present**

- Identify site constraints and guide Foster Farms development decisions by analyzing GIS, USGS, and FEMA data.
- Integrated Web Soil Survey (WSS) and USGS data into ArcGIS to identify soil constraints and evaluate site suitability.
- Deliver flood-risk insights for Foster Farms by coordinating with the Texas Water Board and supporting HEC-RAS modeling.

SJCA Inc. **Indianapolis, IN**
Engineering Intern **May 2025 – August 2025**

- Drafted standardized bridge sketches in MicroStation, improving plan production consistency and engineering documentation quality.
- Prepared field reports, inspection records, and technical exhibits following NHIS and INDOT protocols, maintaining quality control and consistency in regulatory documentation.
- Conducted environmental field investigations across 156 structures in three counties, collecting water-level, stream channel, and surface water data to support permit exhibits, regulatory compliance documentation, and QA/QC reporting.
- Assisted in modelling drainage and urban flood risk conditions using HEC-RAS 2D and HEC-HMS, performing 1D/2D stream modeling and floodplain analysis to support FEMA-compliant watershed studies and stormwater planning.

Protect 7 Healthcare Facility **Abu Dhabi, UAE**
Project Site Engineer **January 2020 – October 2021**

- Coordinated with consultants to track construction status that reduced overtime by 10% and lowered the labor cost by \$12,000.
- Used Civil 3D to design a sanitary sewer system for an 800 m healthcare facility, sizing pipes for 1,425 L/min flow and 323 m³/day discharge per regulatory standards.
- Supported construction oversight for an international project team, managing plans and specifications, design deliverables, and equipment specifications to ensure compliance and on-schedule delivery.

EDUCATION

PURDUE UNIVERSITY **West Lafayette, IN**
M.S Environmental and Ecological Engineering (GPA: 3.73 /4) **January 2024 – December 2025**
Relevant Coursework: Wastewater Treatment, Water contaminants, Coastal Engineering; Hydrology and Hydraulics

42 ABU DHABI **Abu Dhabi, UAE**
Diploma in Software Development **January 2022 – December 2023**

ABU DHABI UNIVERSITY **Abu Dhabi, UAE**
B.S Mechanical Engineering **August 2014 – September 2018**

PROJECTS

Lake Michigan Shoreline Analysis - PURDUE UNIVERSITY **West Lafayette, IN**
Graduate Independent Research **January 2025 - December 2025**

- Conducted flood vulnerability assessments and produced 100-year floodplain inundation maps using HEC-RAS 2D/HEC-HMS to support watershed protection planning and document stormwater management recommendations.
- To support coastal change assessment, standardized multi-year shoreline datasets in ArcGIS, enabling DSAS analysis of historical shoreline position trends.

Flood risk assessment of West Nishnabotna River - PURDUE UNIVERSITY **West Lafayette, IN**
Project Report **August 2024 - December 2024**

- Developed and calibrated HEC-HMS watershed models using historical precipitation and streamflow data, achieving strong model performance (NSE $\approx$ 0.8) to support flood risk assessment and planning.

SKILLS

Data Automation: Python; VBA automation; MATLAB; Statistical analysis; R; Microsoft Office Suite (Excel, Word, PowerPoint).

Hydrologic / Hydraulic Modeling: HEC-RAS 2D; HEC-HMS; StormCAD; SewerCAD; Flood control modelling; Erosion control; Stormwater management; Water resources; Utility infrastructure; Watershed modeling.

Engineering / Process: AutoCAD; Civil 3D; MicroStation; Revit; Plan production; Technical documentation; Stream restoration; Bridge Hydraulics.

GIS / Mapping: ArcGIS Pro; DSAS; Statistical analysis; Environmental site analysis; Field reconnaissance; Site inspections; GPS data collection; Topographic data interpretation; Aerial imagery review; Permit exhibits; Technical reports
